SUMMARY

I am Hari Parajuli, a motivated problem-solver and tech enthusiast with a strong passion for web development and emerging technologies. I enjoy exploring new tools, building practical solutions, and continuously improving my skills through real-world projects. Alongside development, I have been creating tech-focused content on my YouTube channel for over five years, helping others learn and stay updated with technology. I also have hands-on experience in Android app development, with several published apps on the Play Store, and can design clean visuals such as logos and banners using Canva & Figma. I am eager to gain meaningful industry experience through an internship and grow both technically and professionally.

EDUCATION

NATIONAL COLLEGE OF COMPUTER STUDIES

2021- Present

Bachelor's of Information Management

NCCS Secondary School

2019 - 2021

- Computer Science
- Marketing

CGPA - 3.12/4

Kohinoor School

2018

- SEE Examination

GPA - 3.4/4

COURSEWORK

- Programming Fundamentals
 - Data Structure and Algorithm
 - Operating System
 - Computer Network
 - Database Management System
 - Web Development
-

SKILLS

- **Programming Languages:** JavaScript, TypeScript, HTML, CSS, Python, C, JAVA, PHP
 - **Frameworks & Libraries:** Django, React.js, Node.js, Express.js, Next.js, Bootstrap, Tailwind CSS, Laravel
 - **Databases & Caching:** MongoDB, MySQL
 - **DevOps, Tools & Deployment:** Git, GitHub, VS Code, Postman
 - **API & Backend Development:** RESTful APIs, JSON, Authentication (JWT, OAuth)
 - **Others:** Figma, Canva, API Integration, Problem Solving, Responsive Design
-

PROJECTS

- Kurakani - Real-time Chat App

Developed a responsive real-time chat application with seamless text, image, and friend request management features. Implemented secure user authentication with PHP sessions and optimized AJAX-based message handling for smooth live updates. Built a scalable backend using PHP and MySQL, supporting efficient message storage, friend requests, and user status tracking. Designed a clean UI with custom styling and ensured high usability across devices. Integrated image upload, download, and online status functionalities to enhance user experience. (6th Semester Summer Project)

- To-Do App using React

Built an interactive task management app using React, focusing on smooth user experience and clean interface design. Utilized React Hooks and the Context API for streamlined state management, enabling quick updates and fluid real-time interactions.

- Customer Bank Account Management System

Developed a functional Customer Bank Account Management System using Java, focusing on smooth user interaction and secure processing. Implemented core banking features such as login/signup, balance deposit, withdrawal, fund transfer, and account status checking. Designed the system with clear workflows and efficient logic handling to ensure accuracy and reliability throughout all transactions.

ACHIEVEMENT/ CERTIFICATE

- Published multiple Android applications on the Google Play Store, demonstrating real-world development and deployment experience.
- Built and maintained a tech YouTube channel (*Tricky4you*) for 5+ years, consistently creating educational tech content and engaging an active audience.
- Developed a real-time chat application (*Kurakani*) with text, image, and friend request management features, showcasing strong full-stack development skills.
- Hosted and managed multiple WordPress and PHP-based websites on Hostinger, gaining hands-on experience in web deployment, domains, SSL, and server configuration.
- Designed professional logos, banners, and UI assets using Canva & Figma for various projects.
- Demonstrated strong problem-solving abilities by debugging complex issues and implementing optimized solutions across different projects.
- Completed Google's Fundamentals of Digital Marketing certification, gaining strong knowledge of SEO, SEM, and online marketing strategies, and developed hands-on familiarity with Meta Ads and Google Ads for effective campaign management. ([Certificate Link](#))
